

Locally-Made Grow Light Stand

Are you starting seedlings for your garden and looking for an efficient, affordable and effective set up? Support a local builder and community organizer by purchasing one of these attractive grow light stands.

- These rustic yet beautiful wooden grow light stands are made locally from salvaged shipping pallets
- Base accommodates a standard 22" x 11" seed starting tray (included)
- The height of the florescent bulb is adjustable, allowing you to start seedlings and keep them growing until they are ready to head outside
- Includes a 1500 lumen SunBlaster fluorescent grow light (consumes just 24 watts of electricity) and a Nanotech reflector (increases light output by up to 48%)

Price: \$110 - \$150 sliding scale

includes grow light, reflector and plant tray (combined value \$59)
